

PRIVACY 101: FUNDAMENTALS

PRIVACY 101: FUNDAMENTALS

MAINTAIN GOOD PASSWORD HYGIENE

Use **unique** and **complex** passphrases

- Example: d0ghatm!crophonej3lly
- Your passwords do not need to be changed UNLESS they have been compromised

Use a password **manager** if you can

- Most password managers are created equal, but do some research to choose the one that works for you

CHECK FOR SOFTWARE UPDATES

Software updates often include necessary fixes and protection against the latest threats

ENABLE PRIVACY/SECURITY SETTINGS

Every device organizes their Settings Menu differently, but there should be a section called "Privacy and Security."

As you can see, Firefox has three tiers of privacy.

Each one gives you details about what is blocked.
