## AI TALKING POINTS FOR LIBRARY WORKERS

### WHY SHOULD WE CARE ABOUT AI?

Al is seemingly everywhere right now, thanks to enormous venture capital funding and a lot of hype. Popular conceptions about Al are influenced by this hype. There is some potential in Al tools, but also real harms, scams, and other serious ethical concerns.

#### Libraries are and will continue to be impacted by AI and are in a position to educate the public.

### WHAT ARE SOME ETHICAL ISSUES OF AI?

| How it's made: |  | Wha | it it creat | es:  | H |
|----------------|--|-----|-------------|------|---|
|                |  |     |             | •••• |   |

These systems are opaque, even to their creators

Al is often trained on illegally scraped copyrighted material

Al uses exploitative labor, especially in the Global South

Creation, training, and maintenance use enormous amounts of fossil fuels, water, and precious materials

Al scraper bots overwhelm web servers and can cause targeted websites to crash Al is used in predatory surveillance systems and military applications

Al reproduces existing human bias due to training on human-created content

Al regurgitates fake information while sounding authoritative

It perpetuates an "If AI can create it for free, why do we need to pay a person?" approach to labor

#### How we approach it:

Mellon Foundation

There is very little regulation or oversight around the creation and use of Al

Al is part of a well-funded hype cycle that continues to grow

These tools are advertised as a fixall to enhance every aspect of work and play

Reliance on AI is already shown to negatively impact our cognitive abilities

There is a swift and uncritical adoption of AI across sectors
