

WHY SHOULD I BLOCK ADS?

When you browse online, ads can show up as:

- Intrusive images that interrupt your browsing
- Video or sound that automatically plays

Not only are ads an inconvenient energy suck, they can also include trackers that trace your digital footprint.

HOW CAN I BLOCK ADS?

Add an extension to your browser! We recommend:

- **uBlock Origin** is a free and open-source ad-blocker
- **Privacy Badger** identifies and blocks trackers
- **Disconnect** blocks trackers that impact your activity

For mobile devices, **IBlocker** is a good option!

Some browsers prioritize privacy and include a certain amount of ad-blocking in their design:

Firefox

Tor Browser

DuckDuckGo
