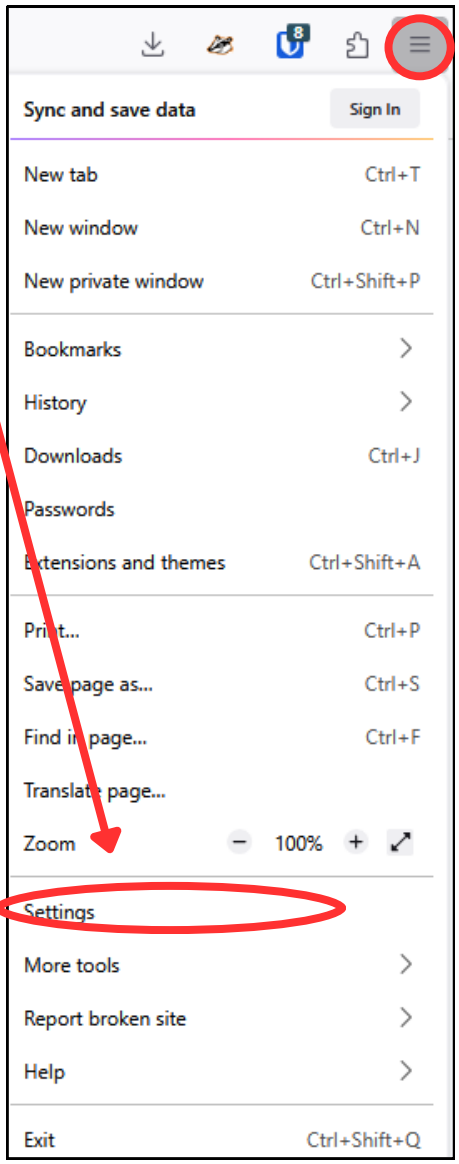
LIBRARY FREEDOM PROJECT

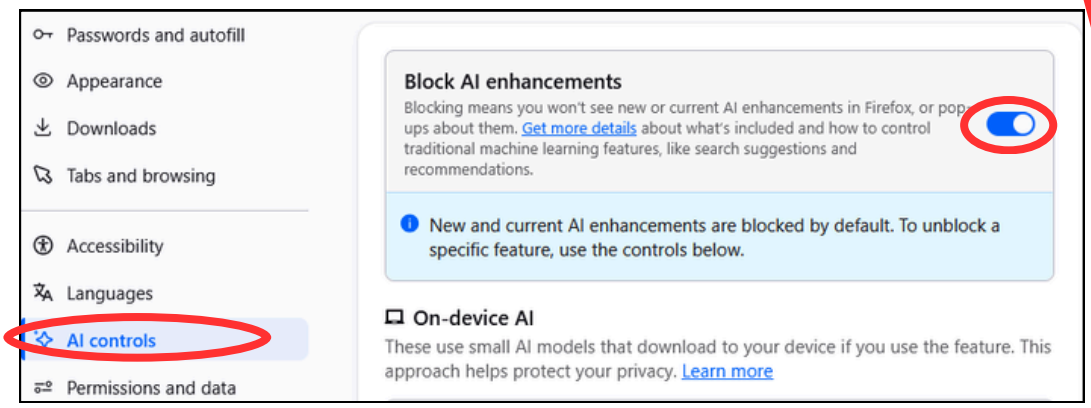
AVOIDING AI: FIREFOX (DESKTOP)

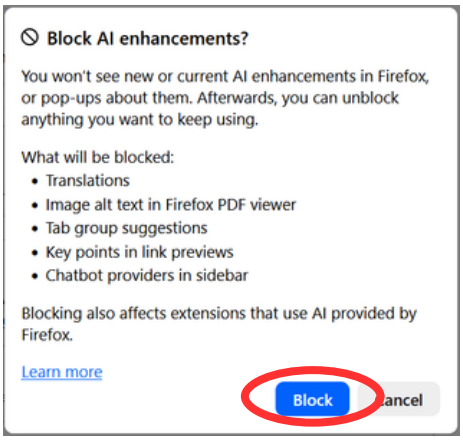
Many web browsers are integrating intrusive AI features. Some are easier to disable than others. **Firefox has some good privacy settings and makes it easy to disable all AI features**:

Open **Firefox**
Click **three lines in upper right corner**
Go to **Settings**



Select **AI Controls** on left-hand sidebar
Switch Block AI enhancements to **On**





In the pop-up that appears, select **Block**

Note: your **web browser** is different from your **search engine**. You'll have to take other steps to disable AI in your search engine.

WHY AVOID AI?

Generative AI is a source of misinformation, and is rife with labor, environmental, and social concerns. It's being pushed by big technology companies through forced adoption by design.

Check out the other side of this sheet for organizing resources.
